

Fig S1. Effect of entry of 2019-nCoV S pseudovirions on 293/hACE2 by TRPML1 inhibitor, 130. HEK 293/ACE2 cells were transduced with either 2019-nCoV S pseudovirions or VSV-G pseudovirions in the presence of 3, 10, 30 $\mu$ M 130. The luciferase activity were measured at 40 hours post inoculation. The experiments were done triplicate and repeated three times.
