Critical Reflection-Clinical Educator Program-POST Questionnaire

Instructions: The purpose of the clinical-educator rotation is to introduce PGY 2 and PGY-3 residents to the fundamentals of clinical teaching aiming to develop skills and competencies to successfully teach other residents and medical students. We want to know if the program is meeting its objectives and we need your input. Now that you have completed your rotation please answer the following questions.

1. How has the clinical-educator curriculum/modules changed your attitude/perceptions about teaching other residents or medical students?
2. How has this experience influenced your day-to-day activities as a resident? Give an example.
3. What elements of the curriculum were most useful and why? (e.g., QNOTE, precepting skills, adult learning, reflective practice, mentoring, etc.)
4. List and explain at least four elements (skills or competencies), of the curriculum that were most challenging to you.
5. In your opinion, how can this curriculum help, residents at different levels, improve their own clinical judgment and effective decision making in the clinical setting to improve patient safety, efficiency and use?
6. In your opinion, how can the rotation help, residents at different levels help in evaluating personal strengths and weaknesses?
7. How can this rotation help define and articulate personal learning goals?

Is there anything else you want to share that will help us improve the curriculum and its experiences?
