Additional file 6: The proliferation of T lymphocytes is induced by polyhedrin peptide (1-110).

A. Scheme showing the process that was followed to evaluate the proliferation of T lymphocytes by flow cytometry. B. The percentage of proliferation induced by the stimulus of three different treatments is shown in three groups of mice previously immunized with: PBS+FA, $PH_{(1-110)}GFP$ and $PH_{(1-110)}GFP+FA$. FA = Freund's adjuvant. Error bars indicate the means \pm SD (n = 3). * $p < 0.05$; ** $p < 0.01$; *** $p < 0.001$ (Two-way ANOVA with Tukey post-tests).
