

**Table 3.** Sites of relapse in the cohort

| <b>Number:27</b>            |                |
|-----------------------------|----------------|
| <b>Distant</b>              | <b>14(52%)</b> |
| Different lobe              | 5              |
| Cerebellum/spinal cord      | 3              |
| Lateral cerebral ventricle  | 3              |
| Basal ganglia region        | 2              |
| Centrum semiovale           | 1              |
| <b>Local</b>                | <b>10(37%)</b> |
| Same lobe                   | 7              |
| Basal ganglia region        | 2              |
| Cerebellum                  | 1              |
| <b>Distant and local</b>    | <b>3(11%)</b>  |
| Different lobe              | 2              |
| Same lobe but distinct site | 1              |
