

137

138 Figure. 14. Distribution of estimated slip (top) and errors (bottom) projected onto
 139 vertical plane along strike. Blue arrows are slips of the hanging-wall side relative to the
 140 foot wall side. Unit of contours are cm/yr. (a) Futagawa fault. Dip angle is 74°. (b)
 141 Hinagu fault. Dip angle is 61°. Vertical dashed lines in these figures indicate crossing
 142 point of two faults. (c) Suizenji fault. Dip angle is 64°. (d) provisional fault in Aso
 143 caldera. Dip angle is 55°.
