

44

45 Figure 4. Interferograms produced during the procedure of correction of ionospheric
 46 disturbances for the pair of images April 26 and June 21, 2016 of P131-F640. (a)
 47 Original differential interferogram in radar coordinate. (b) Interferogram for higher
 48 band. (c) Interferogram for lower band. (d) Double differenced interferogram; i.e.
 49 difference between higher and lower band interferograms. (e) Estimated ionospheric
 50 components. (f) Non-dispersive components in original interferogram; i.e. subtracted
 51 phase of ionospheric components from original one. (g) Flattened and filtered non-
 52 dispersive components of interferogram. (h) Geocoded flattened and filtered non-
 53 dispersive components of interferogram.
