STROBE Statement—Checklist of items that should be included in reports of ***cohort studies***

	Item No	Recommendation
Title and abstract	1	*(a)* Indicate the study's design with a commonly used term in the title or the abstract Title and abstract
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found Abstract
Introduction		
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported Background , paragraph 1-2
Objectives	3	State specific objectives, including any prespecified hypotheses Background, paragraph 3
Methods		
Study design	4	Present key elements of study design early in the paper Methods, paragraph 1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection Methods, paragraph 1
Participants	6	*(a)* Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Methods, paragraph 1
		(*b*) For matched studies, give matching criteria and number of exposed and unexposed N/A
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable Methods, paragraph 2-9
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group Methods, paragraph 1
Bias	9	Describe any efforts to address potential sources of bias N/A
Study size	10	Explain how the study size was arrived at N/A for retrospective study
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why N/A
Statistical methods	12	*(a)* Describe all statistical methods, including those used to control for confounding Paragraph Statistical Analysis
		(b) Describe any methods used to examine subgroups and interactions Paragraph Statistical Analysis
		(c) Explain how

		missing data were addressed Paragraph Statistical Analysis
		(d) If applicable, explain how loss to follow-up was addressed Paragraph Statistical Analysis
		(e) Describe any sensitivity analyses Paragraph Statistical Analysis
Results		
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed Results, paragraph 1
		(b) Give reasons for non-participation at each stage Results, paragraph 1
		(c) Consider use of a flow diagram N/A
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders Results, paragraph 1
		(b) Indicate number of participants with missing data for each variable of interest Results, paragraph 1
		(c) Summarise follow-up time (eg, average and total amount) Results, paragraph 1
Outcome data	15*	Report numbers of outcome events or summary measures over time Results, paragraph 1-2
Main results	16	*(a)* Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included N/A
		(b) Report category boundaries when continuous variables were categorized N/A
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period N/A
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses Results, paragraph 3-4
Discussion		
Key results	18	Summarise key results with reference to study objectives Discussion, paragraph 1
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias Discussion, paragraph 4
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence

		Discussion, paragraph 2-3
Generalisability	21	Discuss the generalisability (external validity) of the study results Discussion, paragraph 2-3
Other information		
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based Financial disclosure

*Give information separately for exposed and unexposed groups.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at http://www.strobe-statement.org.
