

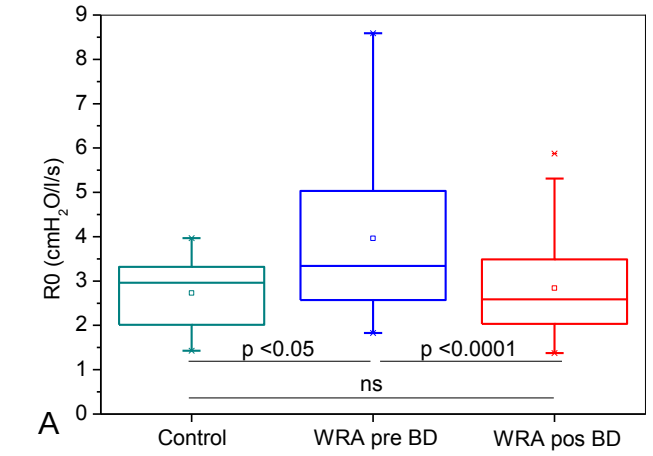

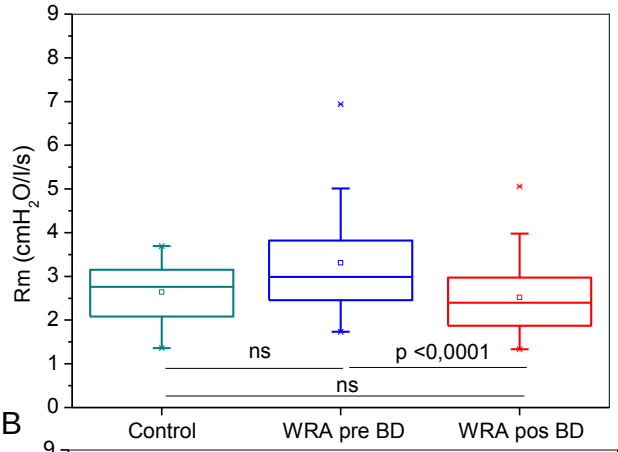

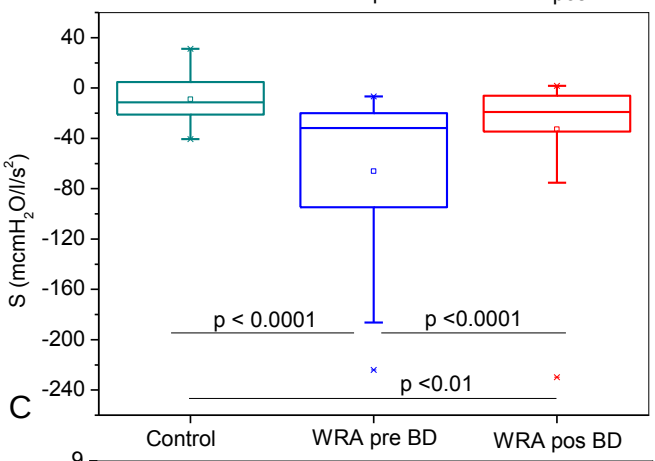

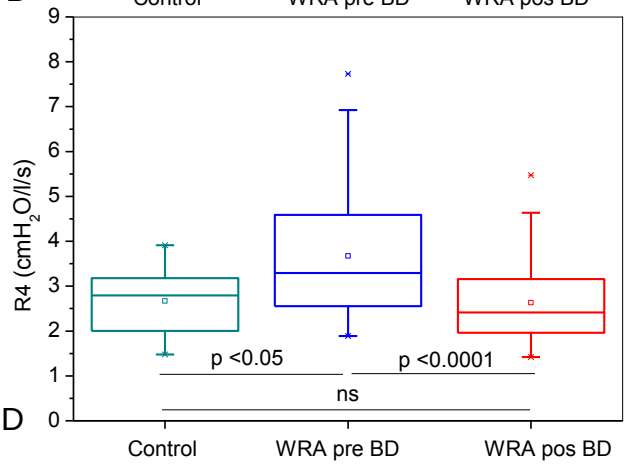

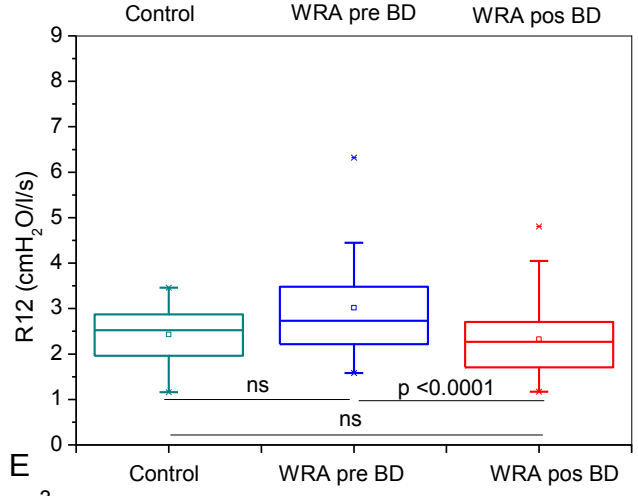

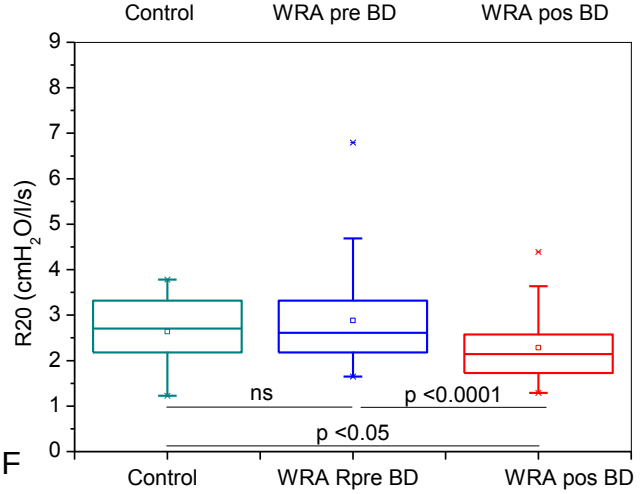

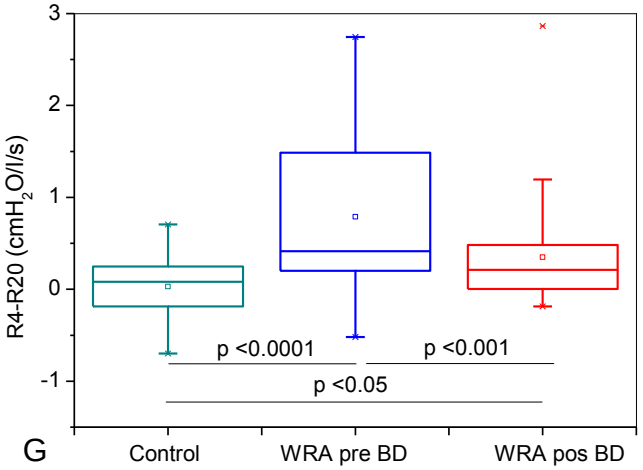

Figure S1 – Comparative analysis of the traditional FOT resistive parameters obtained in controls and patients with work-related asthma (WRA) pre and post bronchodilator use: Resistance in 0 Hz (R0; Figure A), mean resistance (Rm; Figure B), slope of the resistance values (S; Figure C), resistance in 4 Hz (R4; Figure D), resistance in 12 Hz (R12; Figure E), resistance in 20 Hz (R20; Figure F) and difference in the resistance 4 Hz and 20 Hz (R4-R20; Figure G).
