

Additional File 7 – preferred training methodologies

A table with frequencies of preferred training methodologies presented per topic (A-H), presented for all POEs together and for respondents for ports, airports and ground-crossings separately. Highest scores per topic are marked in green. Highest scores per methodology are scored in blue, and where these overlap it is marked yellow. Per score, the absolute number of votes per POE type are shown as (ports, airports, ground-crossings).
