

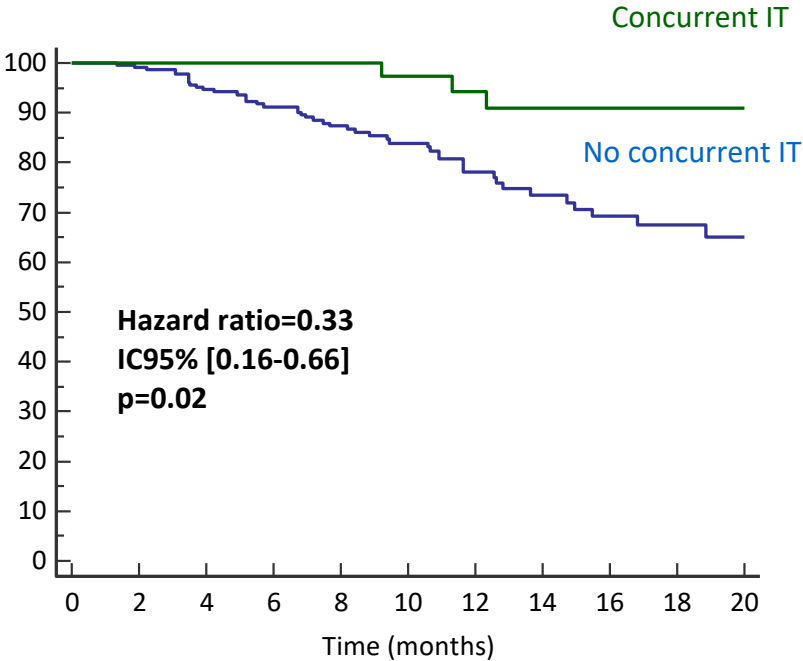

Figure 1: Probability of local control depending on: (A) administration of concomitant immunotherapy (IT) and (B) metastases volume

A.

B.

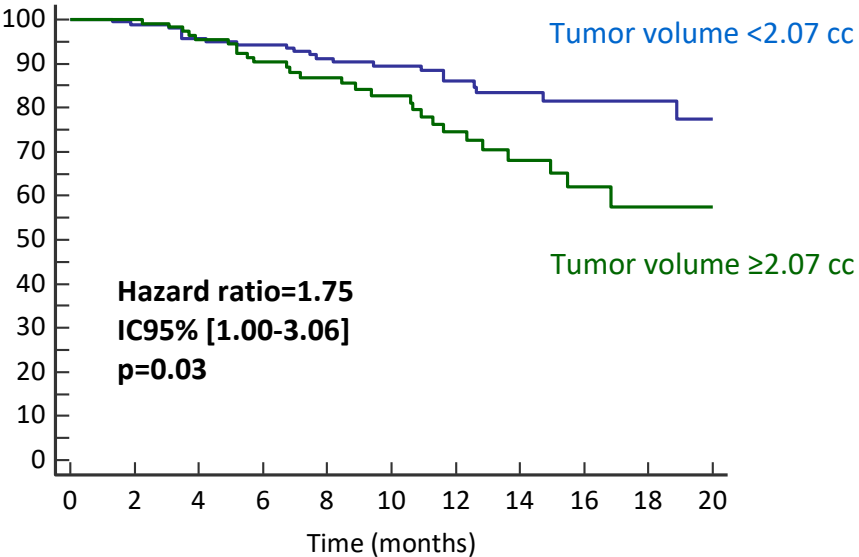

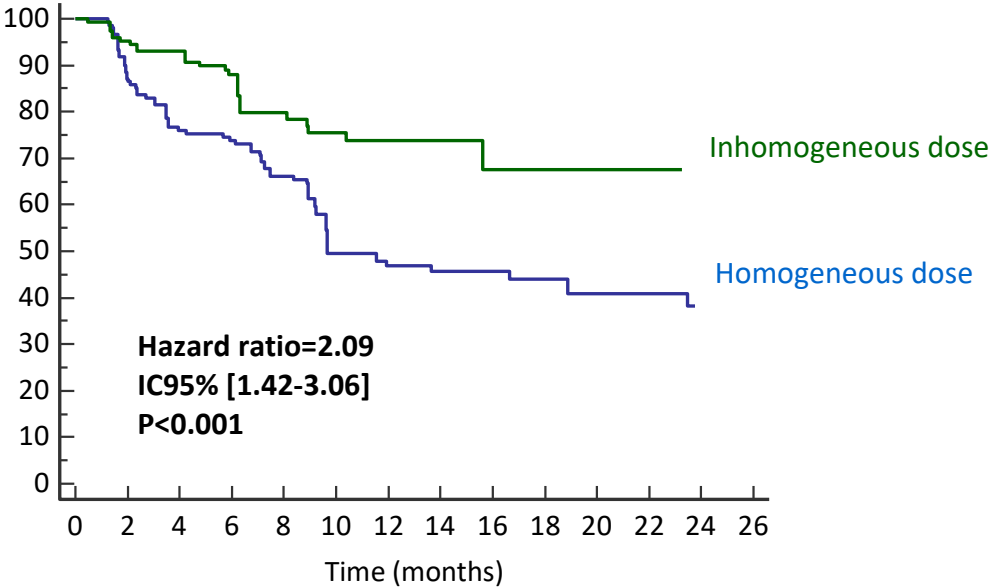

Figure 2: Probability of freedom from distant brain metastases (FFDBM) depending on (A) Dose prescription modality and (B) Administration of concurrent immunotherapy (IT)

A.

B.

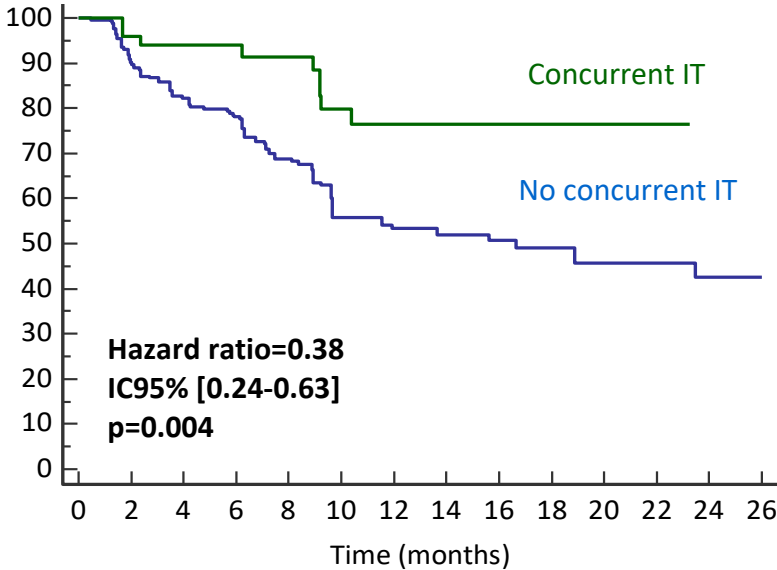

Figure 3: Probability of occurrence of radionecrosis (RN) depending on the administration of concurrent immunotherapy (IT).
