

## 2. Development of research confidence

Please choose one of four responses for each statement (strongly agree, generally agree, generally disagree or strongly disagree) about your research-related behavior:

Section 1: Attitude		strongly agree	generally agree	generally disagree	strongly disagree
A	Learning research skills is important				
B	Understanding how to do research is relevant to my work				
C	I should incorporate research findings into my clinical practice				
D	I should do more research myself				
<p>Can you give reasons for answers to A-D?</p> <p>Can you give any specific examples for questions A-D?</p> <p>Any other comments?</p>					
Section 2: Intentions					
E	I plan to learn more about how to do research				
F	I will bring up the idea of incorporating research into our work with colleagues				
G	I plan to include the use of research findings in my clinical practice				
H	I will suggest that we discuss how to improve our use of research results at our departmental meetings				
<p>Can you give your reasons for answers to E-H?</p> <p>Can you give any specific examples for questions E-H?</p> <p>Any other comments?</p>					
Section 3: Actions					
I	I have suggested casually to some of my colleagues that they should do research				
J	I have spoken in a formal meeting about increasing the amount of research done by our department				
K	I have spoken in a formal meeting (or to my HoD) about increasing the use of research/guidelines in our unit				
L	I am currently working on another research project				
<p>Can you give your reasons for answers to I-L?</p> <p>Can you give any specific examples for questions I-L?</p> <p>Any other comments?</p>
