12. august 2019

Projekt-ID:  
KH/bss

**Research project: Evaluation of Your Heart Forecast.  
A study among Danish general practitioners and patients in the blood pressure  
control program.**

According to your request, an English version of the committee's decision regarding that your project is not notifiable to the Committee, has been prepared.

The assessment dated 13. December 2017 was assessed by the former Chairman of the Regional Committee 1 on Health Research Ethics for Southern Denmark, Dr. Birger Møller.

**The Committee's Decision:**

The Committee has assessed that your project is not notifiable to the Committee, cf. section 14 (2) of the Committee Act.

[Act on research ethics review of health research projects.](#)

In Denmark, the responsibility of evaluating health research projects lies within the responsibility of the Research Ethics Committee System. A health research project is an activity planned according to research methods aiming at producing new, valuable knowledge about human biological and psychological processes, either in relation to healthy persons or for the purpose of prevention, recognition, relief, treatment or cure of diseases, symptoms and pain, including affecting bodily functions.

For further information regarding notifiable projects and the Research Ethics Committee System, please consult the website of [the National Research Ethics Committee](#).

The Committee's decision on not to notify the Committee of your project does not constitute any ethical consideration or negative evaluation of the content of the project itself.

On behalf of the Committee,  
Yours Sincerely,

Kirsten Kyvik  
Chairman of the Regional Committee 1 (2018 to 2021)
