Table 2: Summary of haplotype blocks and the number of haplotypes determined from the rice landrace germplasm: Ch corresponds to the chromosome number, HAP-blocks are the number of haplotype blocks constructed, HAPs is the number of haplotypes, Max (Kb) indicates the maximum size in Kbp for the haplotype blocks, Tag SNPs are the number of SNPs detected in each haplotype blocks, Max SNPs and Min SNPs corresponds to the maximum and minimum SNPs forming the haplotype blocks
