

Quick view of the number of differentially expressed genes derived from either Stromal-high/Immune-low or Stromal-low/Immune-high triple-negative breast cancers compared with the normal adjacent tissue.

	Total DEGs	Overexpressed DEGs	Underexpressed DEGs
Stromal-high/Immune-low	370	187	183
Stromal-low/Immune-high	651	284	367
