

A**B**

Additional file 6. Comparison of “ACE2 Full-PPIN” with network from Gordon, D. E. *et al.* **A.** A co-network of “ACE2 Full-PPIN” with the literature reported 332 SARS-CoV-2 interacting proteins. ACE2 interacting proteins are indicated in light pink, and the SARS-CoV-2 interacting proteins are shown in red color. **B.** After reduce the nodes with single connection, a core smaller PPIN was obtained to show a clear relationship between ACE2 interacting proteins and SARS-CoV-2 coding proteins.
